

## Laboratorio # 8

Ingresamos a descargar el VPN

Descargas directas

**Descarga directa de Psiphon para Android**

Si no tiene acceso a la tienda de Google Play, puede descargar e instalar ("sideload") Psiphon para Android directamente.

**Psiphon para Windows**

Works on Windows 10 and 11.  
(Legacy builds are available for Windows XP and Vista, and for Windows 7, 8, and 8.1.)

Abrimos psiphon

The image shows the Psiphon 3 application window. The title bar reads "Psiphon 3". The interface is in Spanish. At the top, it says "Patrocinado por PSIPHON". Below this, a large red warning icon (a triangle with an exclamation mark) is displayed, followed by the text "PSIPHON ESTÁ DESCONECTADO". A green button labeled "CONECTAR" is positioned below the text. On the left side, there is a sidebar menu with the following options: "DESCONECTADO" (highlighted in blue), "CONFIGURACIÓN", "COMENTARIOS", "ACERCA DE", "REGISTROS (LOGS)", "LANGUAGE", and "لغة" (Arabic). At the bottom of the window, there is a section titled "Seleccionar región del servidor" (Select server region) with a dropdown menu showing "Mejor rendimiento" (Best performance).

Alerta de Tráfico Denegada

Túnel dividido

Si se habilita, las solicitudes hechas a servidores dentro de su país de residencia no serán enviadas a través del túnel de Psiphon.

Los sitios web dentro de su país de residencia generalmente no se encuentran bloqueados, por lo que habilitando esta opción le dará a ud. un acceso veloz a estos sitios y algunas veces reducirá los costos de uso de ISP.

☒ No proxyficar sitios web dentro de su país

☐ No usar proxy en sitios web chinos

**ADVERTENCIA:** Esta característica usa datos que podrían no siempre ser confiables. Usa precaución cuando la habilites, ya que algunos sitios web censurados podrían ser excluidos del proxy sin intención.

Deshabilitar límite de tiempo de espera para redes lentas

What is My IP Address?

Your IP address revealed to the rest of the world is shown below, and it is also known as the public IP address. You may have an IPv4, an IPv6 or both depending on the connection type. If you're behind a router, the IP address shown below would be your router's IP address and your computer would have received a private IP address from a DHCP server.

IPv4 Address: 103.133.210.165

City/Region: Bogotá, Bogotá D.C.

Longitude: -74.0817

ISP: Not Available

ASN: Not Available

Postal code: 111411

IPv6 Address: Not Detected

Country: Colombia

Latitude: 4.6097

Organization: AS262191 LIBERTY NETWORKS DE COLOMBIA S.A.S

Proxy: No proxy present

Timezone: America/Bogota

Ingresamos a DNS Propagation Check para mirar las locaciones mas cercanas

The screenshot shows the DNSMap website's 'DNS Propagation Check' interface. The domain 'facebook.com' is entered, and the record type is 'A'. A table lists DNS providers and their global status:

Provider	Status
Google	Global
Norton	Global
Comodo	Global
OpenDNS	Global
Verisign	Global
Level3	Global

Below the table is a world map with several IP addresses highlighted in green boxes, indicating DNS propagation locations. The taskbar at the bottom shows the Windows operating system with various application icons and system information like temperature and date.

Elegimos la región a la cual nos vamos a conectar

The screenshot shows the Psiphon application interface. The left sidebar contains navigation options: 'DESCONECTADO', 'CONFIGURACIÓN', 'COMENTARIOS', 'ACERCA DE', 'REGISTROS (LOGS)', and 'LANGUAGE'. The main content area is titled 'Región del servidor Psiphon' and includes a description of the service and a list of available regions for selection.

**Región del servidor Psiphon**

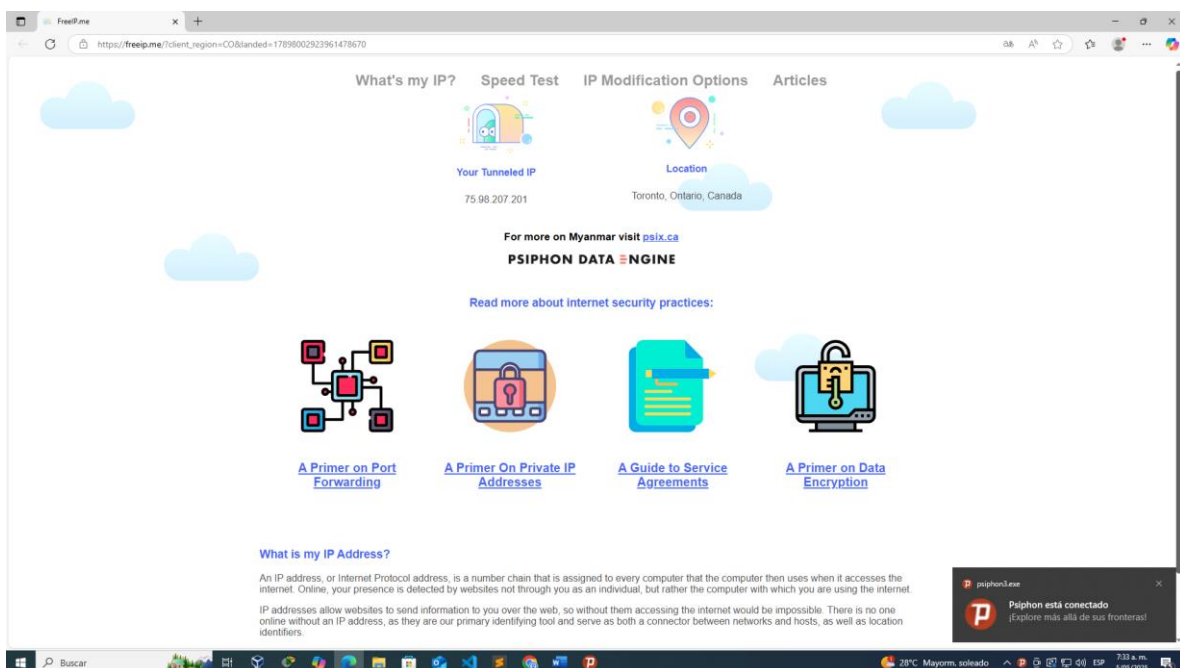

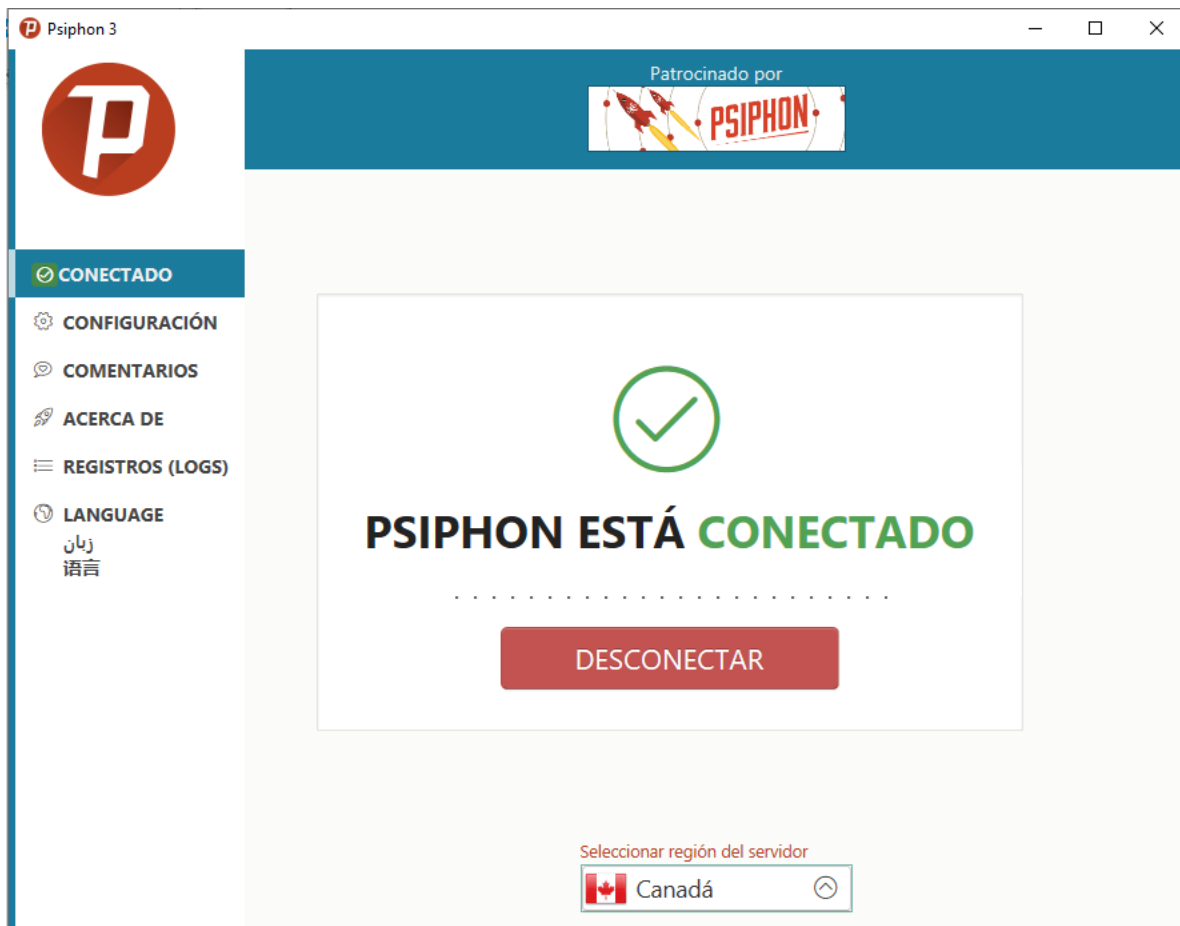

Psiphon tiene servidores en muchos países y regiones diferentes. Usar un servidor Psiphon en una región cercana a su país natal generalmente proporcionará una mejor conexión a la red, pero puede que desee acceder a sitios web y servicios como si estuviera virtualmente en un país o región específica.

Elegir la opción predeterminada **"Mejor Desempeño"** permite a Psiphon escoger automáticamente un servidor, que generalmente resultará en la mejor conexión posible a la red.

**Mejor rendimiento**

- Austria
- Bélgica
- Bulgaria
- Canadá
- Suiza
- Alemania
- Dinamarca
- España
